Multo WD Concentrate 60

Universal Service formulation

Multo WD is a highly effective universal product, with extraordinary rust preventive properties. At the same time it is also water displacing, lubricating and will penetrate old rust.

Multo WD also fulfils NATO CODE C-620. MIL-C16.173 E Grade2 for use within Army, Navy, Air Force and civil defence as well as aircraft and space industries

Multo WD is a synergic mix of corrosion inhibitors, oxidized petrolatum and an anorganic complex in a low aromatic solvent with flash point 40°C.

Dilution: Turpentine or N-paraffin, depending on the wanted drying time and film thickness.

Multo WD

- * Protects many kinds of metal, iron, steel and aluminium.
- * Neutralizes fingerprints.
- * Excellent protection of goods exported by ship, passing tropical climates, where condensing is a problem.
- * excellent for protection of spareparts in stock
- * will also protect against humidity in electrical installations.
- * Protection of metal moulds of many kinds in plastic and rubber industries.
- * Flexible formulation, the user can dilute, depending on the protection and film wanted. Used 100% gives the highest protection.

Data: Multo WD 60 Concentrate

Gravity	0,87
Flash point °C	40
Solids %	41%
TBN	96

Protection, outdoor up to 12 months
indoor up to 24 months

Packing: 210 Liter steel drums
4x5 Liter in a carton
