(Super) oil treatment

- Description** An oil-additive to improve the decreased performance of motor oils.
- Application** One single tin (+/- 325 ml) (SUPER) OIL TREATMENT for every oil change interval. (one can treats up to 6 litre)
- Add content to motor oil with engine running at operating temperature. Mixes easily with the motor oil.
- After application of the product, preferably warm-up by letting the motor run idle for a little while.
- Properties** Improved lubrication.
- Mixes easily and definitely with all mineral and synthetic lubricating oils.
- Improved "shear" stability as compared with that of the conventional motor oil formulations, thus giving the equipment a longer life.
- Improved oxidation stability.
- Reduced oil consumption and exhaust smoke.
- Improved motor performance, more economic and smoother driving properties.

Typical analysis :

- density at 15°C : 0.877
- viscosity at 100°C : 410 cSt
- flash point : >200 °C
- colour : 3.5
